## EXPERIENCE

### Institution of Engineers (India), VIT Chennai

Dec 2025 – Present

Technical Lead

- Lead cross-functional technical teams of 10+ through full project lifecycle from planning to deployment
- Mentor junior students in backend development and best coding practices, improving team output quality
- Spearhead organization of technical events and hackathons, fostering institute-wide collaborative innovation

### UrjaSense

Nov 2025 – Present

Chief Technology Officer

- Architected scalable backend infrastructure using Node.js, Supabase, and REST APIs to support real-time data pipelines
- Reduced API response latency by 40% through targeted query optimization, indexing, and caching improvements
- Drive R&D in AI-based automation, integrating local LLM tooling and workflow engines to accelerate feature delivery

### Y-SOC ([ysoc.in](#))

Nov 2025 – Present

Code of Conduct Head

- Govern ethical standards and team processes across a 200+ member society, ensuring accountability
- Established structured escalation and reporting workflows, significantly reducing issue resolution time
- Serve as primary liaison for inter-team communication, maintaining alignment between leadership and contributors

## PROJECTS

### Aura Honda — Showroom Management System — [aurahonda.com](#)

- Built and deployed a production-ready showroom management system live in an actual business, replacing manual inventory and billing processes
- Designed RESTful APIs with Node.js and Express.js backed by Supabase, implementing role-based access control and real-time data updates

### AutoShorts AI — YouTube Shorts Automation Platform

- Built an end-to-end AI-powered YouTube Shorts generation platform in Python that converts a topic or custom script into ready-to-publish short-form videos
- Automated script generation, scene creation, voice synthesis, subtitle generation, image generation, and video rendering into a fully autonomous pipeline
- Published 12 AI-generated Shorts that accumulated 15,000+ organic views within 48 hours, validating the production workflow
- Designed a modular architecture with interchangeable AI components, enabling fully local execution with no paid APIs while maintaining scalable content generation

### Rahi Boot House — Business Website & Digital Transformation — [rahibothouse.com](#)

- Designed and developed a premium responsive website for a 65+ year-old footwear business, establishing its digital presence and improving customer engagement
- Built modern UI using React, Tailwind CSS, and Framer Motion, optimizing animations for seamless desktop and mobile experiences
- Implemented interactive brand showcase, business timeline, contact system, and SEO-friendly, performance-optimized architecture

### NOVA — AI Assistant (Ollama)

- Built a context-aware AI assistant with persistent memory and real-time news extraction using Python and MongoDB
- Integrated Ollama for fully local LLM execution, delivering a privacy-focused solution with zero cloud dependency and swappable models

## EDUCATION

### Vellore Institute of Technology (VIT), Chennai

2024 – 2028 (Expected)

B.Tech — CSE (Data Science)

Coursework: Data Structures, Algorithms, DBMS, Machine Learning | Class XII: 84.8% | Class X: 81%

## SKILLS

**Languages:** Python, Java, C, C++, JavaScript, SQL, HTML, CSS

**Backend & DBs:** Node.js, Express.js, MongoDB, Firebase, Supabase, PostgreSQL, REST APIs

**AI & Data:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Keras, OpenCV, XGBoost, SMOTE, Data Preprocessing, Feature Engineering, Model Evaluation, Ensemble Methods, Ollama (Local LLMs), Tableau, Power BI

**Tools & Tech:** Git, GitHub, Linux, VS Code, Postman
